

Title: Project Engineer

Location: St Louis, MO

Salary Range: \$0.00 to \$120,000.00 No bonus but a pension

Degree/Major Required: BS Engineering

Position Description:

Excellent opportunity with a global company that has a strong history of innovation and an excellent work/life balance and traditionally low turnover. Seeking a **project engineer** for their manufacturing facility located near Saint Louis, Missouri. Will travel approx. 15%.

Experience:

BS degree in Engineering. (ChemE a plus)

Demonstrated project leadership/management and at least 5 years of experience in an industrial environment.

Must possess and demonstrate experience executing capital projects including project scope, budgeting, equipment/material selection and procurement and contractor management

Must have operating company experience.

Demonstrated ability to work with engineering firms to drive excellence in progressing projects through the various stage gates during the lifecycle of the project.

Experience in the chemical manufacturing or heavy industrial type facility. Experience in a PSM regulated industry preferred.

Sound knowledge of industry best practice change procedures for projects and demonstrated ability to implement and manage throughout the life cycle of the project.

Thorough understanding of industry best practices and Project Stage Gate processes and best practices for effective project execution.

PMP certification a plus.

Should be open to approx. 15% travel

Responsibilities:

Will generally handle smaller capital projects up to maybe \$3-4 MM in size at times.

Responsibility for assisting with the annual plan for capital projects and budgeting.

Demonstrated past experience in leading capital projects safely, on budget and schedule.

Maintain project schedule by monitoring project progress, coordinating activities, and resolving problems.

Work with local ESH representatives to obtain necessary permitting and ensure all PPA/PHA action items are addressed during the project cycle.

Work with the engineering contractor to build estimates during the various phases of the project cycle and effectively communicate these estimates to Operations and Maintenance teams

Develop construction schedules for the project and report to facility management on the project status.
